Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter: upon close review of the claims, the prior art, and applicant's remarks it appears that the allowance of claims 1, 2, 4-8, and 11-26 are appropriate.

The prior art of Foster, used in the outstanding office action, discloses a conference call system in which the participants are randomly prioritized to limit the number of voice streams transmitted and received during the conference call rather than '...a conference call server determining, based on the received data packets, if any of the terminals participating in the conference call are currently providing voice data, and if so, identifying each of the terminals currently providing voice data...' as in claim 1; '...wherein the voice data is included in the second data packet based at least in part on a determination by the conference call server that a third packet received from the second terminal includes the voice data...' as in claim 11; '...decoding a first data packet with voice data and determining that the first data packet includes voice data...' as in claim 14; and '...decoding a received stream of RTP packets from a plurality of terminals to extract background noise information and any voice data and determining if the decoded stream includes any voice data...' as in claim 22.

Further, it would be contrary to the teaching in Foster to insert indicia identifying any terminal that provided any voice data associated with encoded combined data since Foster prioritizes participants to limit the number of voice streams.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 Form.
